

Elkem is one of the world's leading companies in the production of environmentally friendly speciality materials. The company has production facilities in Europe, North-America, South America and Asia, well as an extensive network of sales offices. Elkem is part of the Orkla Group, a leading Norwegian public company.

Elkem Silicon Materials is a division in the Elkem Group and one of the world's leading suppliers of El Silicon® and Elkem Microsilica®. Important user areas for Elkem Silicon Materials products are construction-, automotive-, oil-, solar- and metallurgical industries.

To strengthen our Raw Materials team we are now looking for a Mining Engineer

The Mining Engineer will work in Elkem's Exploration Team Quartz.

The main tasks will be:

- Mine planning applying Vulcan 3D modelling software
- Development of geological models in close cooperation with geologists
- Planning and design of mine infrastructure
- Evaluation of quartz occurrences / deposits and operations
- Economic evaluation of mining projects
- Topographical surveys of new occurrences / deposits
- Quality assurance
- Project management
- Research and development of quartz raw materials
- Ensure that operations are according to relevant HES regulations

Requirements:

- M.Sc. / Ph.D. in mining or geology
- Experience in mining or geology, open pit operation, quarrying is an advantage
- Experience in 3D mining and geological modelling software
- Ability to work independently and structured in an international environment
- Result- and team oriented
- Knowledge of Elkem plant operations or raw material sources is an advantage
- Fluency in English

Travelling, both in Norway and internationally, must be expected. The position reports to the Raw Material Director of Elkem Silicon Materials.
